

Experiment blending 3 images

Minh Truong

Groups: Minh Truong, Fei Xu, Floyd R

- $\text{color} = 0.1 * \text{pass_Color} + 0.3 * \text{tex_color} + 0.8 * \text{tex_color_light} + 0.4 * \text{tex_color_extra};$

- $\text{color} = \text{tex_color} * \text{tex_color_light} * \text{tex_color_extra}$

- $(\text{tex_color_light.r}) * \text{tex_color} * \text{tex_color_extra}$

red

Blue

Challenges

- Adding the third image
- How to map each texture into separate coordinates in the same model ? (still not answer)
- -> choose images that fit the default mapping (mapping each image into 4 corners of the plane)

Thank you!
